

A wide-angle photograph of a massive glacier front, likely in Antarctica, showing a significant collapse. The glacier's surface is heavily crevassed and fractured. A large, dark, rocky area is visible at the base of the glacier, indicating the point of collapse. The sky is a pale, hazy blue.

# GLACIER FRONT COLLAPSE

A wide-angle photograph of a massive glacier front, likely in Antarctica, showing a significant collapse or calving event. The glacier's surface is heavily crevassed and textured. A teal banner with white text is overlaid at the bottom.
